INTRODUCTION

Many organizations struggle to maintain high-performing equipment asset management programs, costing them millions of rands in production lost and unnecessary maintenance expenditures. Medical Equipment plays an important role in the provision of quality service in the Health Sector. Proper management of assets takes a systematic approach to maintain assets, providing optimal value for as long as possible. This reduces asset expenditure and boosts work performance through high-quality equipment.

Ministry of Health needs to have a comprehensive strategy to invest, operate, maintain, and upgrade or discard assets. It's essential to know everything you can about your assets to get the most value from them. It's important that a system centrally coordinates equipment asset management and maintenance to keep track of the assets. When Ministry of Health managers and subordinates have a quick and easy access to information they need for daily operations, the chances are that they can all work smarter.

Asset management system tracks the who, where and when of all your vital assets. In today's healthcare environment, scrambling for supplies is a daily occurrence. The bottleneck of trying to source critical hospital equipment or spare parts is an increasing concern especially considering covid 19 global disruptions. In addition, this software helps resolve these and other longstanding challenges healthcare professionals face. Tracking assets and automating materials management processes lets hospitals and other healthcare facilities perform at optimal level. It also helps control costs, reduces equipment leasing, tightens security, minimizes theft, complies with regulations.

Why Use Asset Management SYSTEM?

Why should Ministry of Health use asset management system?

- See a faster return on your asset investment
- Provide measurable improvement to your operating efficiency to stakeholders
- Lower your costs by analyzing what assets are good and what assets are bad
- Reduce the administrative burden of producing complex reports
- Provide a higher level of compliance
- Manage your risk better
- The health workers can identify all the faulty equipment and report to the medical technicians for repair.
- Encourage all health workers to carry out equipment inventory regularly to enable them to know what is available, what is faulty and what needs repair or replacement in their facilities.

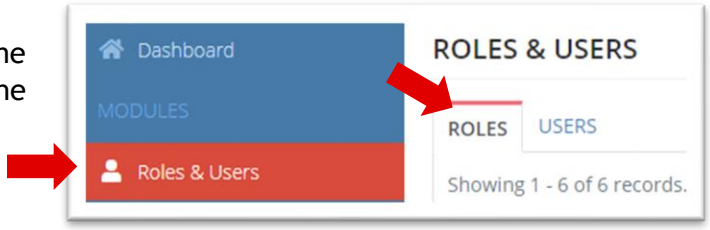

A. Adding Roles and Users

Introduction

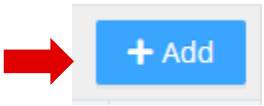

Asset Management System allows users to manage and create new users and assign them roles in the system when there is a need for expansion. You can create new users and configure them to their facilities.

I. ADDING ROLES

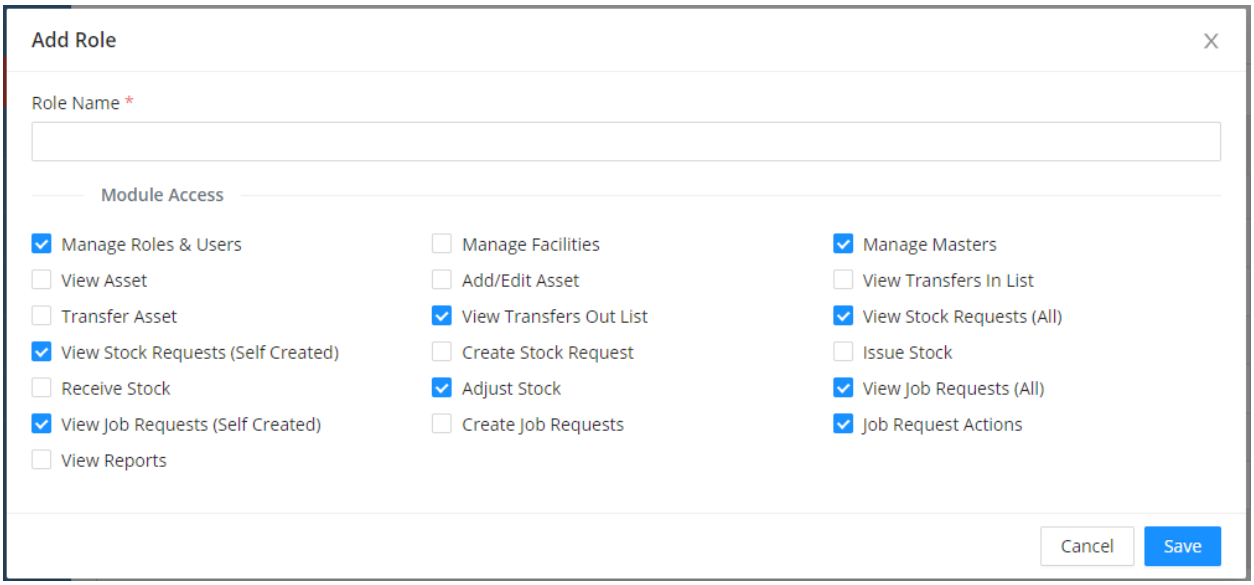

1. From the Asset Management home screen, click on **Roles & Users** on the modules bar and click **Roles.**

2. Click **Add** on the top right corner to add roles to the system.

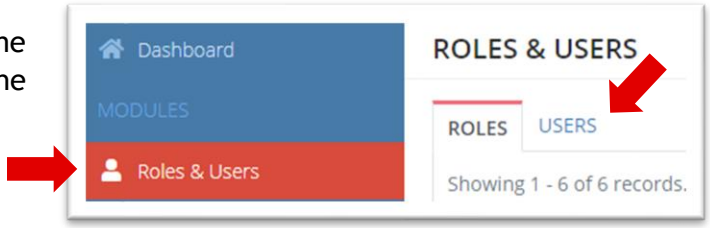

3. On the Add user pop-up, add the **Role Name** and assign rights to that role name. Then, click **Save.**

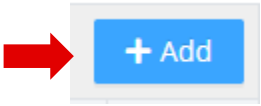

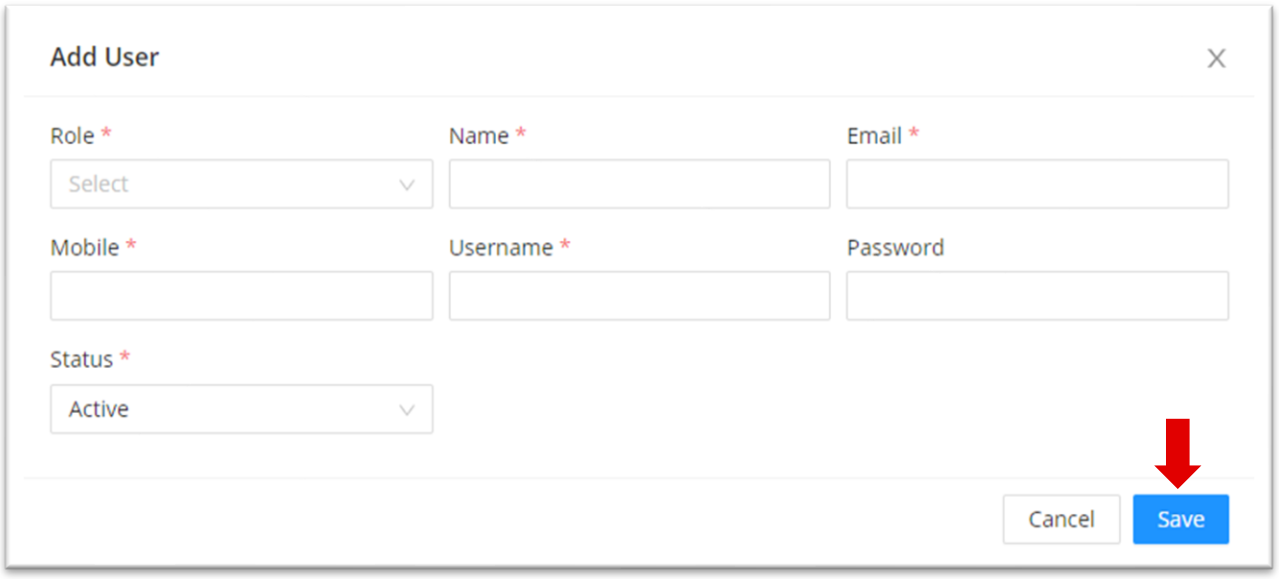

II. ADDING A USER

1. From the Asset Management home screen, click on **Roles & Users** on the modules bar and click **Users.**

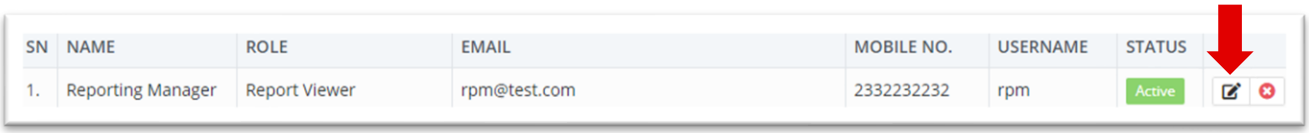

2. Click **Add** on the top right corner to add a new user to the system.
3. On the Add user pop-up, add the **Role, Name, contact details** and **status** of the newly - added user. Then, click **Save.**
   NOTE: When assigning a role, a dropdown of the earlier-added roles appears.

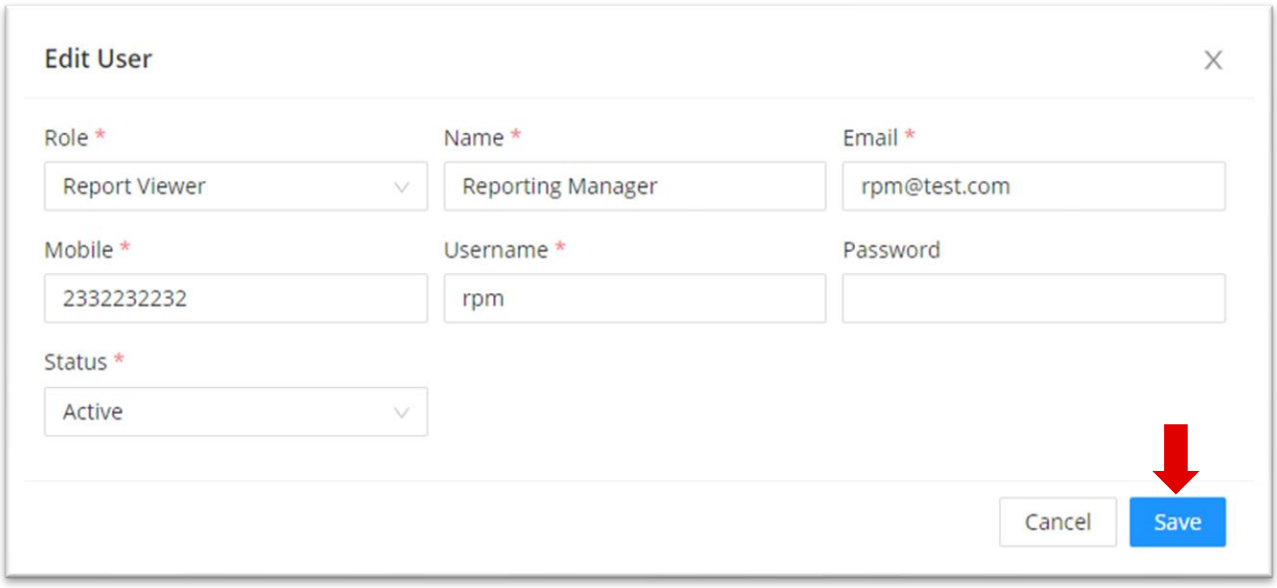

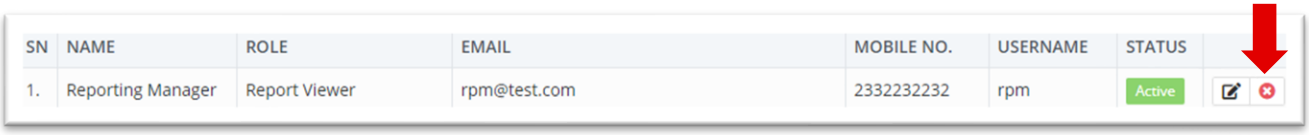

4. Click the **Edit button** to edit a user in the system.

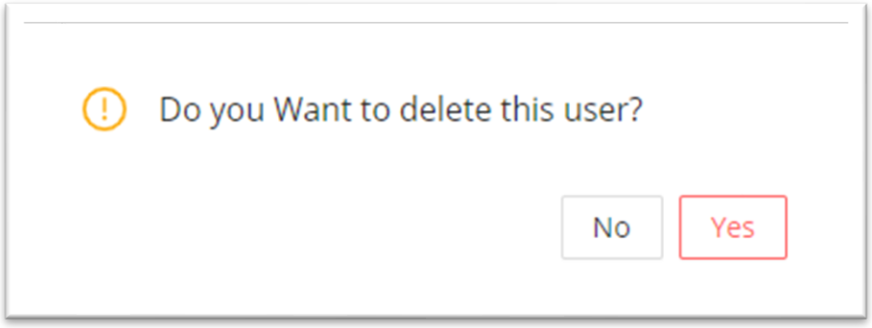

5. On the Edit user pop-up, update the user's information, and click **Save.**

6. Click the **Delete button** to delete a user in the system.

7. In the confirmation box, click **Yes.**

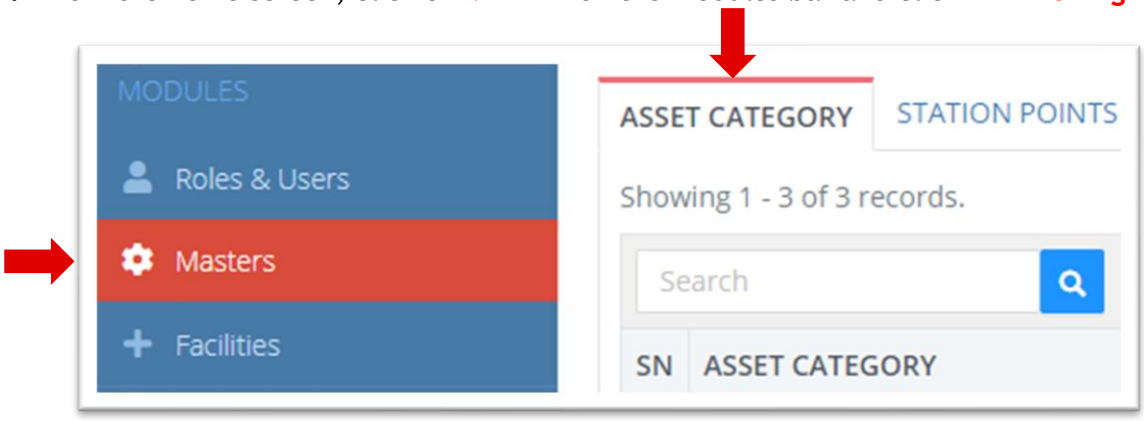

B. MASTERS

INTRODUCTION

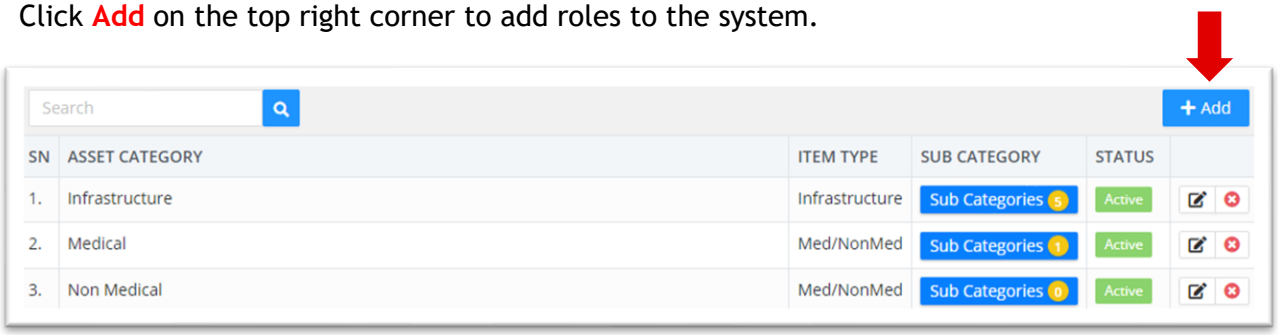

In the master list, this is where you find information on **Asset Category, Station Points, Manufacturers, Service Providers, Vendors, Unit of Measurement, Model** and **Items**.

I. ASSET CATEGORY

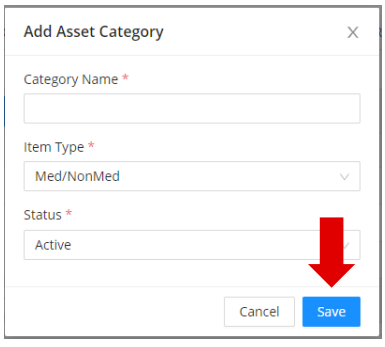

1. From the home screen, click on **Masters** on the modules bar and click **Asset Category.**

2. This is where one with administration roles add new asset categories or subcategories. Click **Add** on the top right corner to add roles to the system.

3. On the Add u pop-up, add the **Category, Type** and **status.** Then, click **Save.**
   NOTE: The pre-loaded asset categories were provided by BIOMED on the requirements gathering.

4. Click the **Edit button** to edit a category in the system. On the Edit category pop-up, update the category's information, and click **Save.**
5. Click the **Delete button** to delete a category in the system. In the confirmation box, click **Yes.**

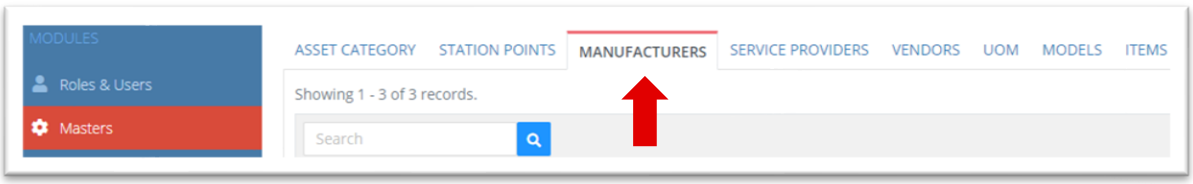

II. STATION POINTS

1. These are the wards or departments where the equipment located. Click **Station Points.**
2. Click **Add** on the top right corner to add station points to the system.
3. On the Add u pop-up, add the **Station Point** and **status.** Then, click **Save.**
4. Click the **Edit button** to edit a station point in the system. On the Edit station point pop-up, update the station point's information, and click **Save.**
5. Click the **Delete button** to delete a station point in the system. In the confirmation box, click **Yes**

III. MANUFACTURERS

1. These are or individuals or companies that manufactures equipment. Click

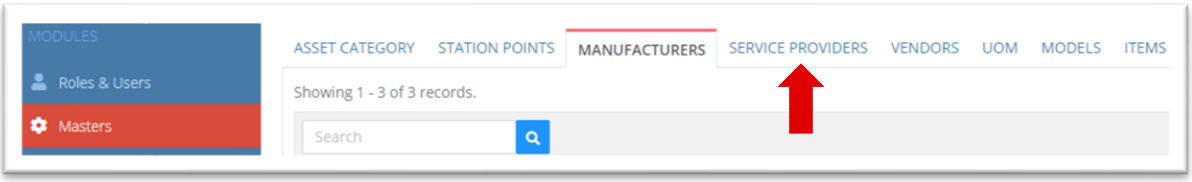

Manufacturers.

2. Click **Add** on the top right corner to add manufacturer to the system.
3. On the Add u pop-up, add the **Manufacturers Name, contact details, location** and **status.** Then, click **Save.**
4. Click the **Edit button** to edit a manufacturer in the system. On the Edit service provider pop-up, update the manufacturer's information, and click **Save.**
5. Click the **Delete button** to delete a manufacturer in the system. In the confirmation box, click **Yes**

IV. SERVICE PROVIDERS

1. This is an individual or entity that provides services to the equipment. Click **Service Providers.**

2. Click **Add** on the top right corner to add service providers to the system.

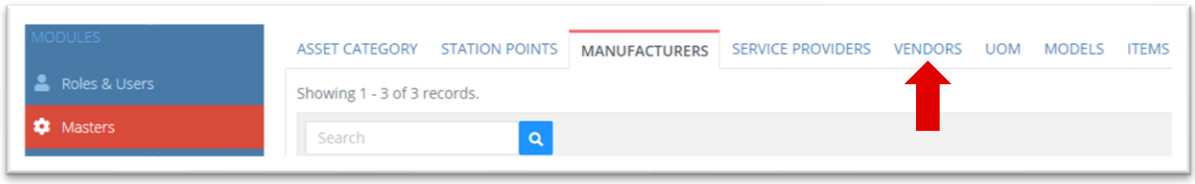

3. On the Add u pop-up, add the **Service Provider's Name, contact details,** and **status.** Then, click **Save.**

4. Click the **Edit button** to edit a service provider in the system. On the Edit service pop-up, update the service provider's information, and click **Save.**

5. Click the **Delete button** to delete a service provider in the system. In the confirmation box, click **Yes**

V. VENDORS

1. This is a person or company offering equipment for sale. Click **Vendors.**

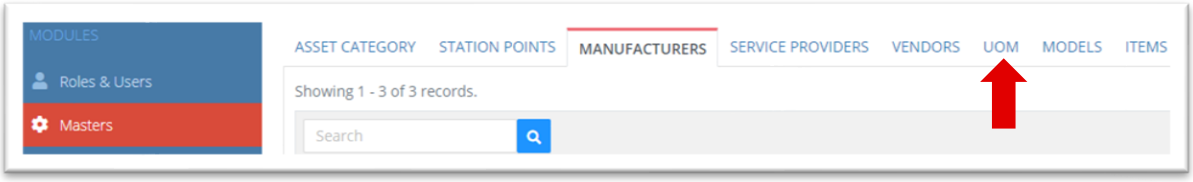

2. Click **Add** on the top right corner to add vendors to the system.
3. On the Add u pop-up, add the **Vendor's Name, contact details,** and **status.** Then, click **Save.**

4. Click the **Edit button** to edit a vendor in the system. On the Edit vendor pop-up, update the vendor's information, and click **Save.**

5. Click the **Delete button** to delete a vendor in the system. In the confirmation box, click **Yes**

VI. UNIT OF MEASUREMENT (UOM)

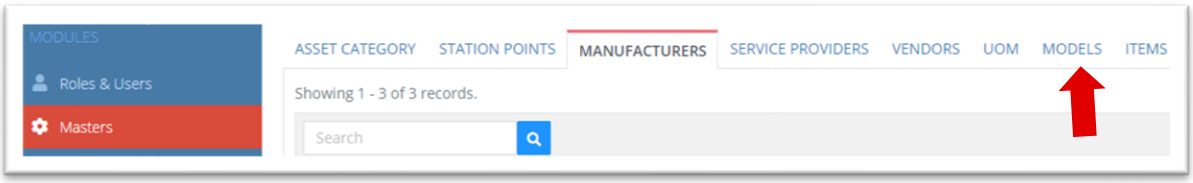

1. Click **UOM.**

2. Click **Add** on the top right corner to add UOM to the system.
3. On the Add u pop-up, add the **UOM** and **status.** Then, click **Save.**
4. Click the **Edit button** to edit a UOM in the system. On the Edit UOM pop-up, update the UOM information, and click **Save.**
5. Click the **Delete button** to delete a UOM in the system. In the confirmation box, click **Yes.**

VII. MODELS

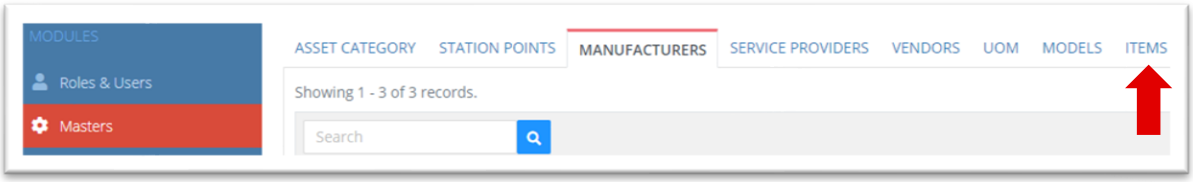

1. Click **Models.**

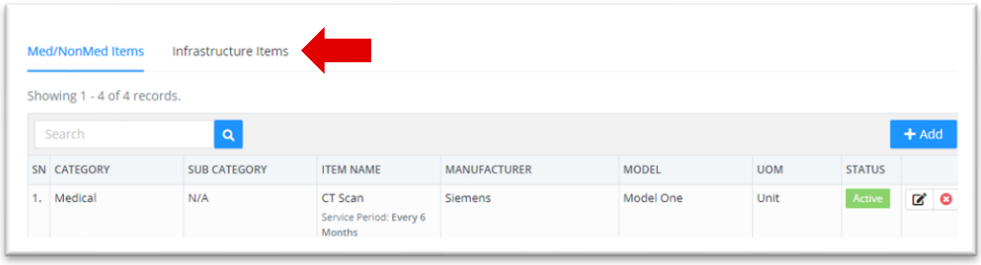

2. Click **Add** on the top right corner to add models to the system.
3. On the Add u pop-up, add the **Model** and **status.** Then, click **Save.**
4. Click the **Edit button** to edit a Model in the system. On the Edit Model pop-up, update the Model information, and click **Save.**
5. Click the **Delete button** to delete a Model in the system. In the confirmation box, click **Yes**

VIII. ITEMS

1. Click **Items.**

2. Choose the Item category

3. Click **Add** on the top right corner to add items to the system.

4. On the Add u pop-up, add the **Items** and **status.** Then, click **Save.**

5. Click the **Edit button** to edit an Item in the system. On the Edit Items pop-up, update the Items information, and click **Save.**

6. Click the **Delete button** to delete an Item in the system. In the confirmation box, click **Yes**

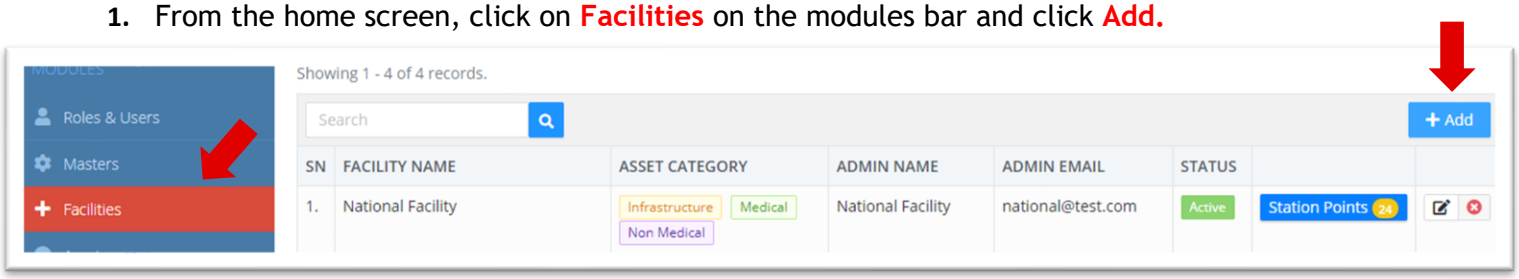

C. FACILITIES

INTRODUCTION

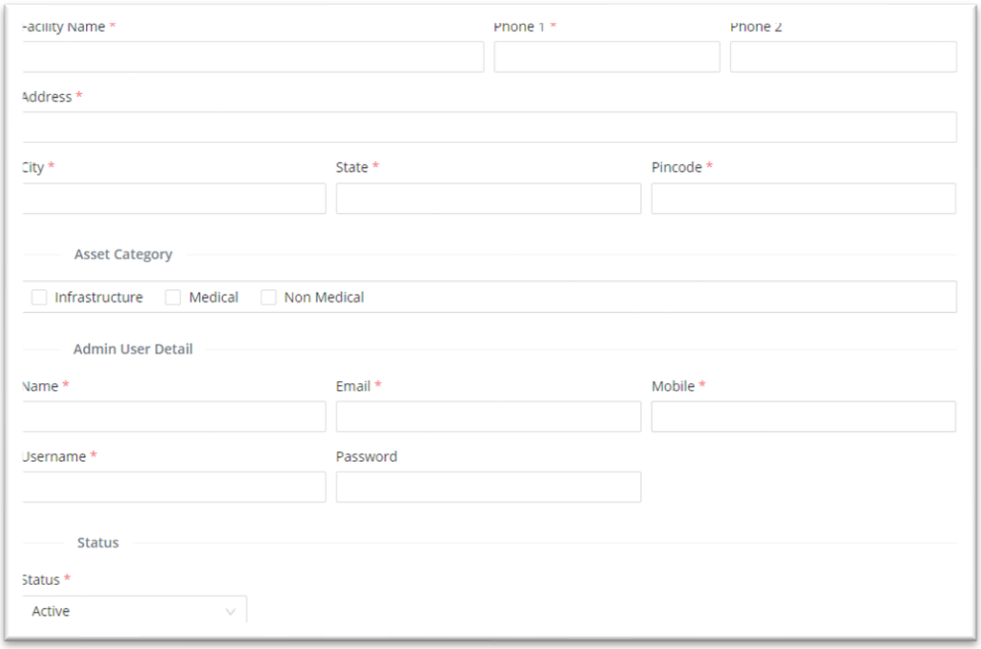

Asset Management Module allows users to manage and create new facilities in the system when there is a need for expansion. You can create new facilities and configure them to their department or wards.

I. ADD FACILITY

1. From the home screen, click on **Facilities** on the modules bar and click **Add.**

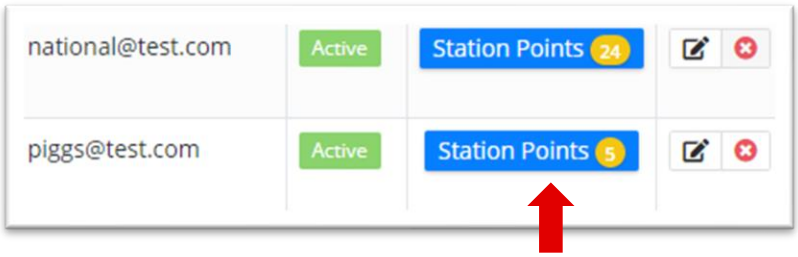

2. On the Add facility pop-up, add the **Facility Details, Asset Categories, Admin User Details** and **Status.** Then, click **Save.**

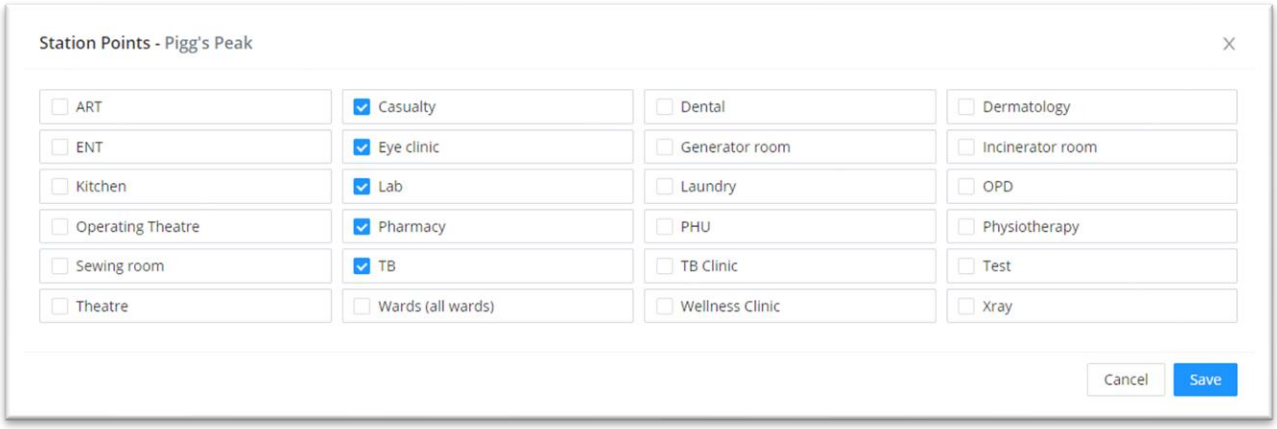

3. Click the **Edit button** to edit an Item in the system. On the Edit Facility pop-up, update the facility's information, and click **Save.**

4. Click the **Delete button** to delete a facility in the system. In the confirmation box, click **Yes**

5. Click on **Station points** to add or remove station points available in a facility.
6. On the pop-up, add the **station points.** Then, click **Save.**

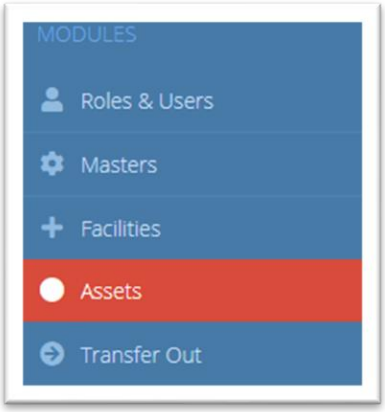

D. ASSETS

INTRODUCTION

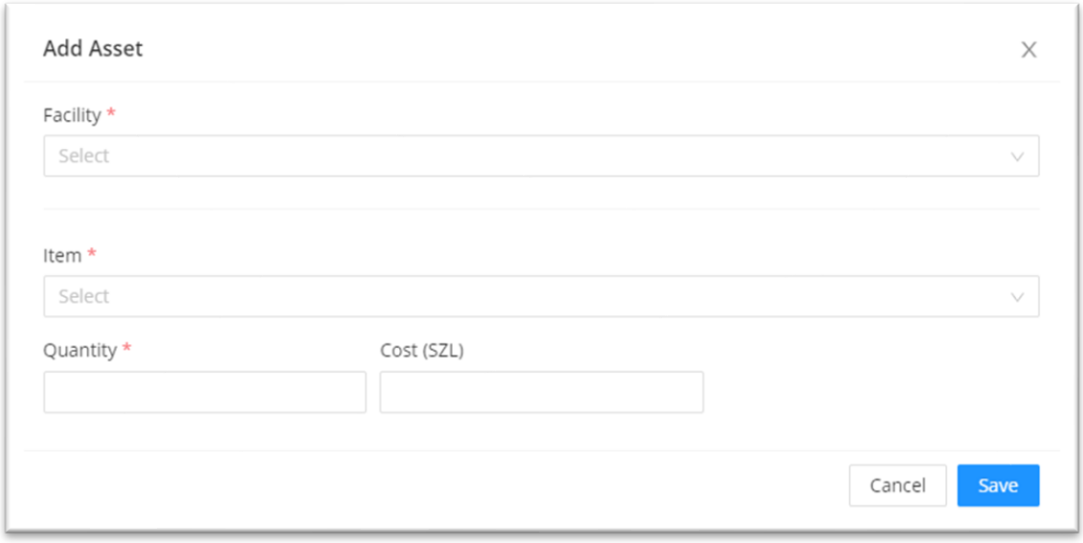

Asset Management module allows users to manage and create new assets and assign or transfer them between facilities them to facilities.

I. ADDING ASSETS

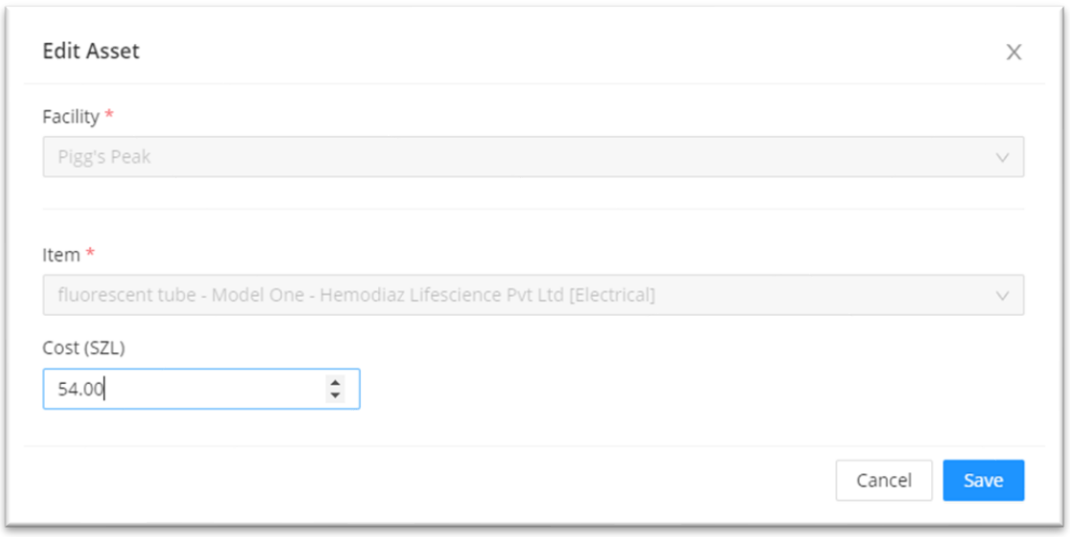

1. From the Asset Management home screen, click on **Assets** on the modules bar and click **Add** to add assets.

2. On the Add u pop-up, add the **Facility, Item, Quantity, Cost** and **status.** Then, click **Save.**

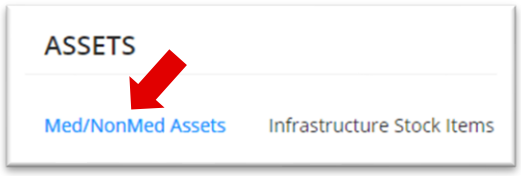

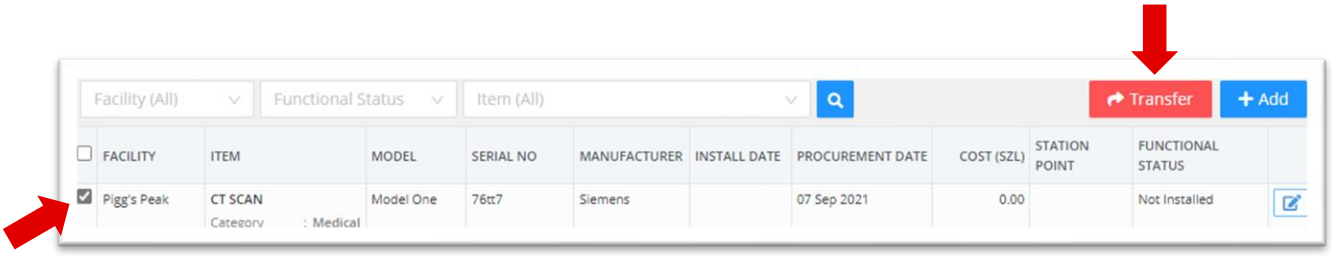

3. Click the **Edit button** to edit an Asset in the system. On the Edit Asset pop-up, update the Asset information, and click **Save.**

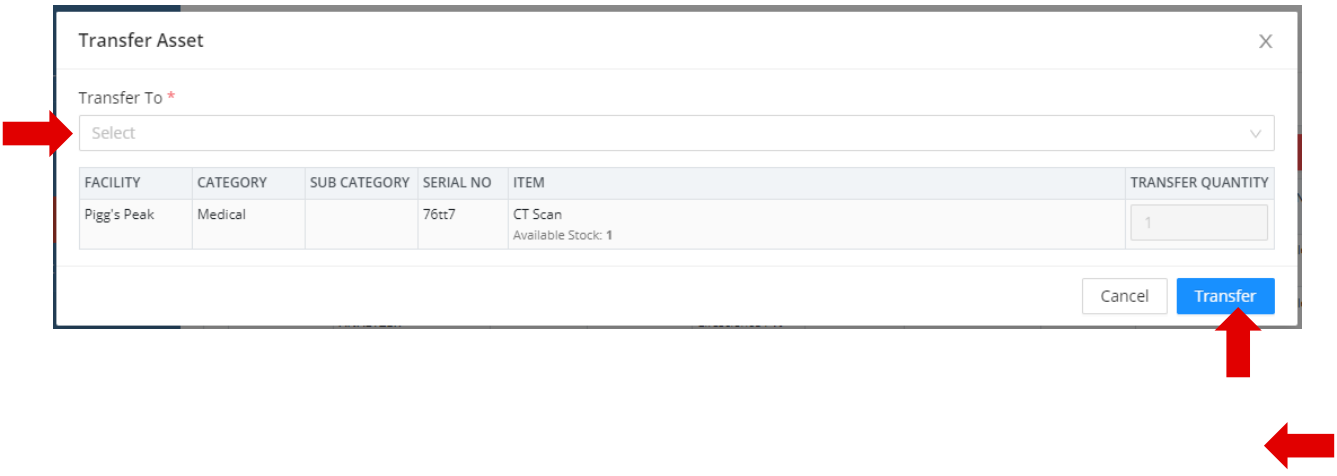

II. TRANSFERRING ASSETS

1. First select the category of the asset.
2. Select the asset you want to transfer. Then click **Transfer** button.

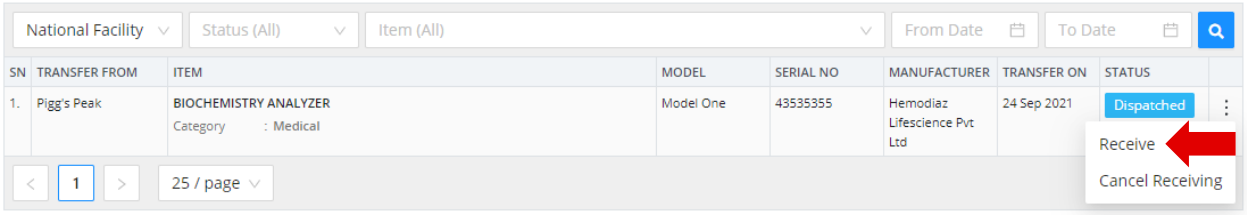

3. On the transfer asset pop-up, select the facility you want to transfer to from the dropdown. Then put the number of assets to be transferred. Click **Transfer.**

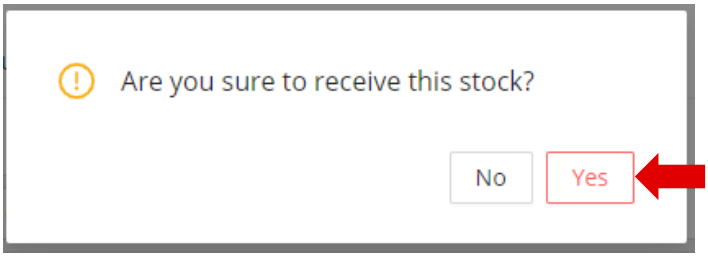

III. RECEIVING ASSETS

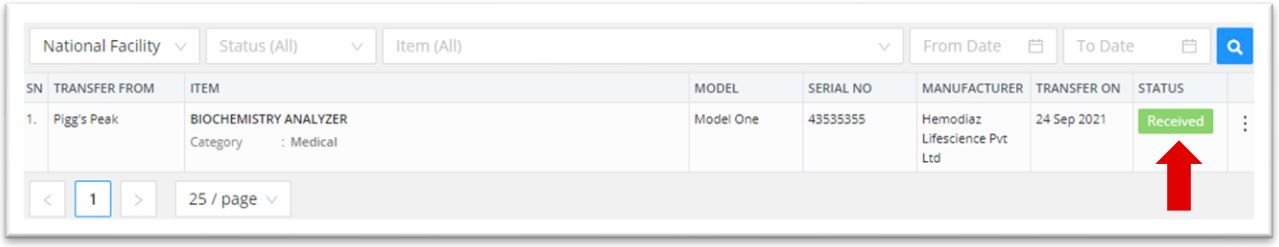

1. Click **Transfer In**, then click the **Options** button and select **Receive** from the dropdown.

2. In the confirmation box, click **Yes.**

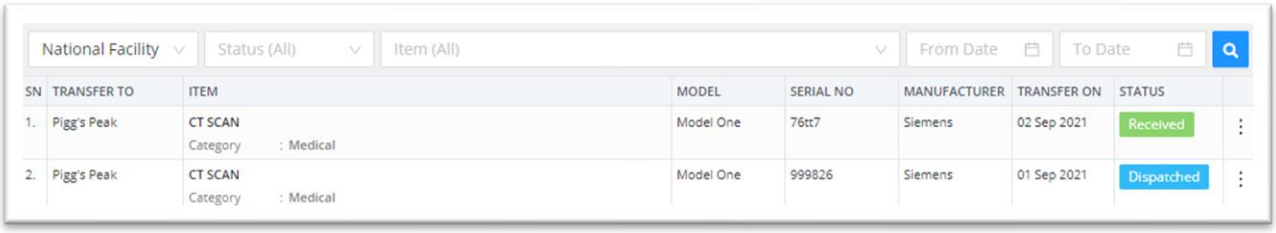

3. The Status updates to **Received.**

IV. TRANSFER OUT

1. This is where one can view all transferred out assets from their facility, one can see the date of the transfer and status of the asset if it has been received. In case where there is a lot of assets transferred out, one can filter by **facility, status, item and date** of transfer.

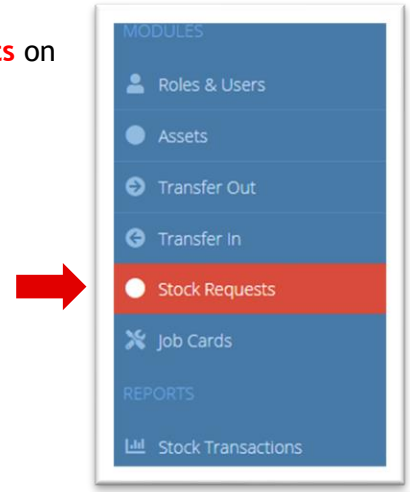

E. STOCKS REQUESTS

INTRODUCTION

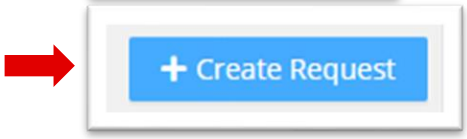

Asset Management module allows users to create stock requests.

I. CREATING STOCK REQUESTS

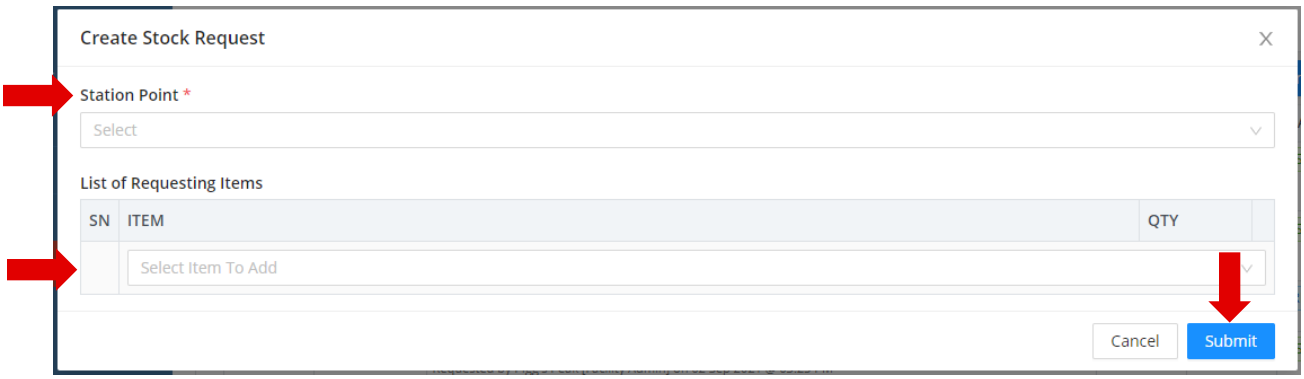

1. From the Asset Management home screen, click on **Stock Requests** on the modules bar.

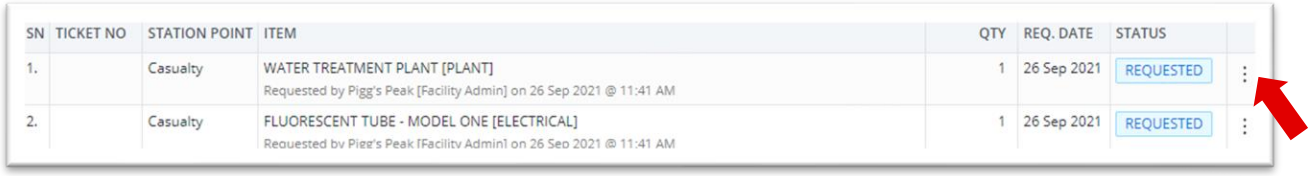

2. Click **Create Requests** to add assets.

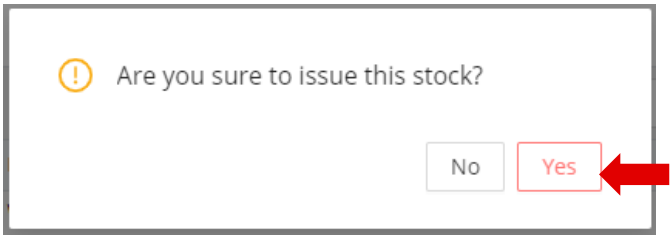

3. On the Create Stock Request pop-up, select the station point, requested items and quantity from the dropdowns, then click **Submit.**

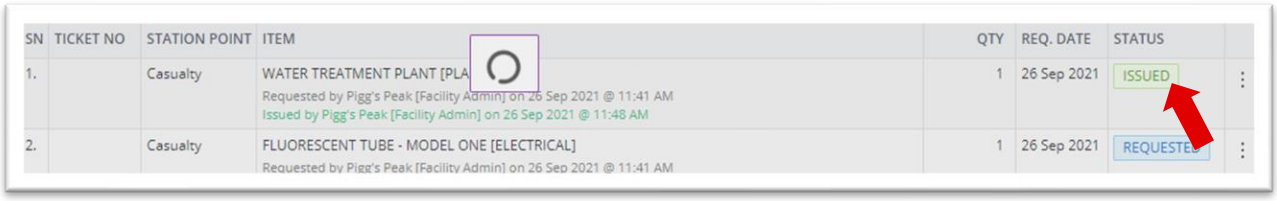

4. Click the **Options** button and select **Issue** from the dropdown.

5. In the confirmation box, click **Yes.**

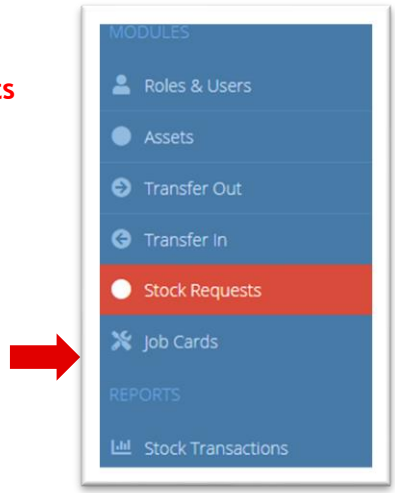

Note: The status updates from **Requested** to **Issued**.

F. JOB CARDS

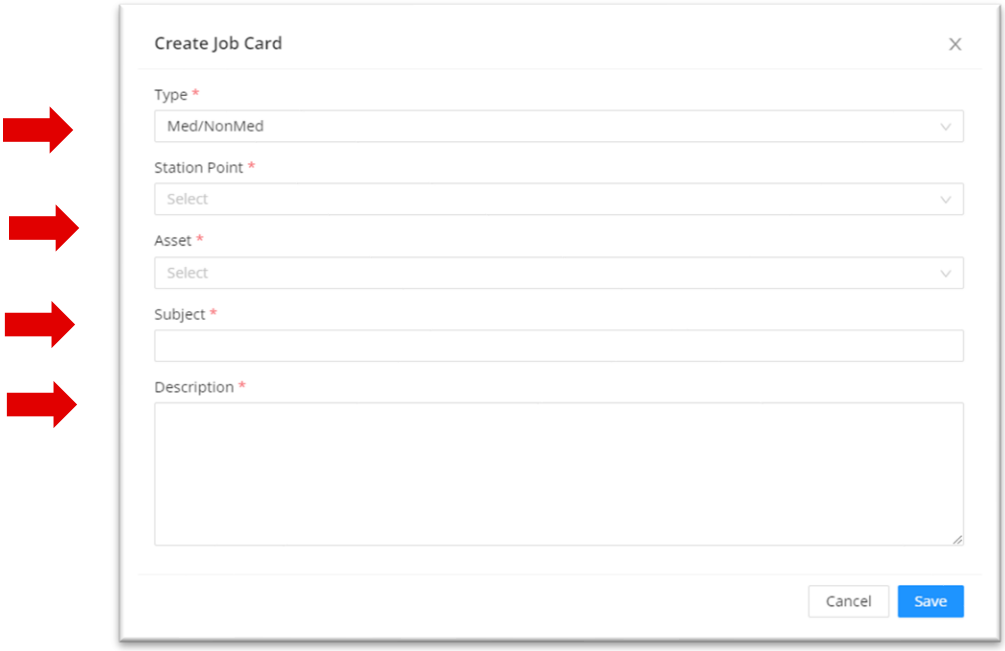

II. JOB CARDS

1. From the Asset Management home screen, click on **Stock Requests** on the modules bar.

2. Click **Add** on the top right corner to add a job card.

3. On the Add job card pop-up, add the **Type, Station Point, Asset Subject, Description.** Then, click **Save.**

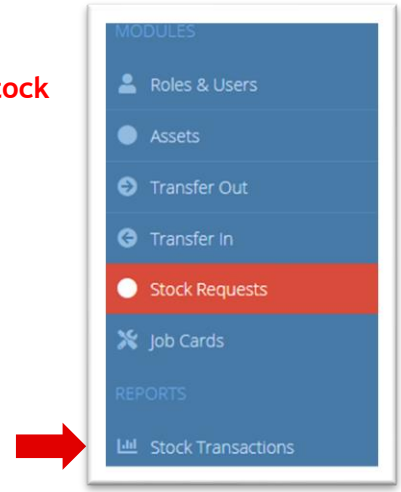

4. Click the **Edit button** to edit a job card. On the Edit station point pop-up, update the job card's information, and click **Save.**

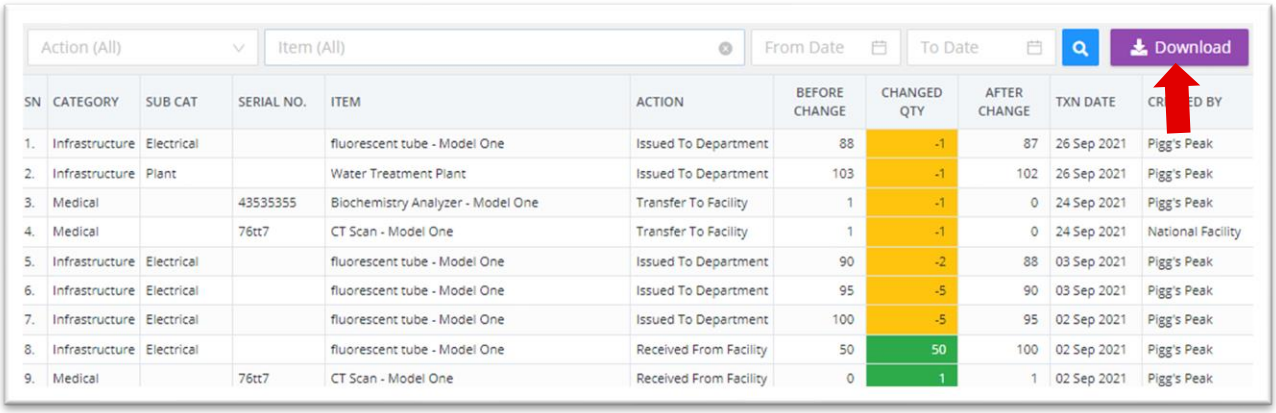

G. REPORTS

II. STOCK TRANSACTIONS

1. From the Asset Management home screen, click on **Stock Transactions** on the reports bar.

2. One can view all the stock transactions and can download the report as a csv file by clicking the **Download** button.
